

Incoming 6th, 7th and 8th Grade Work for Math:

Please log on to IXL. Go to the “Learning” section. Under “Skill Plans”, select “IXL plans”. Once redirected you will find the summer boost plans for math. Please select the grade that you will be in this coming school year. This is a 20 day plan that will get you ready for the next level. Please utilize the worked examples and video tutorials for help and get to a smart score between 65 – 80.

Incoming 6th, 7th and 8th Grade Work for Science:

Have fun being a scientist! Please log on to the page-specific address of sciencebuddies.org website below. Choose one of the themes that interests you. Within that theme, select one experiment to conduct and to write a report on. Within your report, please include the theme chosen, the title of the project, and the question the project was attempting to answer. Explain what you built and how testing it attempted to answer the question. Include some analysis and your conclusion. Draw a picture of your completed project and/or your testing. Bring your report, your picture, and your completed project to school in August. Be ready to present your project and your results!
